

Turf and Sand Don't Fail Because Guests Are Heavy.

They fail because four narrow legs concentrate a guest's full weight onto a few square inches — enough to punch through sod, sink into sand, and leave a venue with a repair bill. ChairMates treats soft ground as an engineering problem: a chair built wide from the base up, and patent-pending feet that retrofit the fleet you already own.

THE COLLECTION

Chairs, Chair Feet, Table Feet

THE CHAIRS · RESIN FOLDING CHAIR

Start With the Chair

The foundation of the collection. A resin folding chair engineered from the base up for turf and sand — a widened, patent-pending footprint that spreads a guest's weight instead of concentrating it. Fully assembled, padded, stackable and field ready in white or black.

- **Patent-Pending Base:** a wide foot at every corner, built in, not added on.
- **850 lb Capacity:** rated well past the load any guest will put on it.
- **Padded Seat, No Steel:** resin frame and vinyl seat — no rust, no repaint.
- **Field Ready:** arrives assembled, folds flat, stacks for transport.

AT A GLANCE

Finishes	White · Black
Weight Capacity	850 lbs
W × D × H	17.63" × 17" × 31.1"
Seat Height	18.13"
Chair Weight	13.4 lbs
Warranty	2 Year Total

THE CHAIR FEET · 4" PROTECTIVE SHOES

Retrofit the Fleet

For the chairs already on the truck. A two-piece ball-and-shoe assembly slips onto a chair leg in seconds and spreads its load across a 4" disc. Six colors, including a clear polycarbonate version that all but disappears against turf and sand.

- **4" Diameter Disc:** heavy-duty ToughResin; clear made of polycarbonate.
- **Ball and Shoe:** the ball pivots, so the disc stays flat on uneven ground.
- **Fits What You Own:** Chiavari, Cross Back, Bentwood and more.
- **Installs in Seconds:** no tools, no drilling, no modification to the chair.

AT A GLANCE

Diameter	4"
Material	ToughResin / Polycarbonate
Assembly	Ball + Shoe
Colors	6
Installation	Tool-free
Status	Patent Pending

THE TABLE FEET · 6" ANTI-SINK, 4 PACK

Level the Table

The same idea scaled up for the table. A 6" warm-gray disc under each leg keeps a loaded banquet table from tilting into soft ground — the difference between a cake that arrives and a cake that doesn't. Sold four to a pack, one table's worth.

- **6" Wide Footprint:** distributes leg pressure across a full disc.
- **Warm Gray Finish:** neutral under linen; coordinates with any setup.
- **Chiavari Table Fit:** designed for plywood and Steel Skeleton legs.
- **Also Fits Stages:** works under Standup Stage legs on soft ground.

RETROFIT WHAT YOU OWN

Chair Feet & Table Feet

CHAIR FEET · 4" BALL & SHOE · PATENT PENDING

A Wider Foot in Seconds

Grass & Sand Collection Protective Shoes spread a chair leg's load across a 4" disc instead of a tube end. The ball pivots inside the shoe, so the disc finds the ground flat even where the ground isn't.

- Fits What You Own: Chiavari, Cross Back, Bentwood and more.
- Six Colors: including a new clear polycarbonate version.
- Installs in Seconds: no tools, and comes off just as fast.
- Built for Hard Duty: collegiate turf, golf courses, beaches.

Chair shoes ship as ball-and-shoe assemblies; contact Furniture Innovations for pack quantities and per-color SKUs. All items patent pending; chairs and table feet carry a 2 Year Total warranty.

TABLE FEET · 6" ANTI-SINK · 4 PACK · PATENT PENDING

Keep the Table Level

A loaded banquet table concentrates far more weight per leg than a chair does, and it has further to fall. The 6" anti-sink foot puts a full disc of warm gray ToughResin under each leg — sized for Chivari plywood and Steel Skeleton tables, and for Standup Stage legs on the same soft ground.

- 6" Footprint: a wider base to distribute table leg pressure.
- Warm Gray: neutral under linen, easy to coordinate.
- Chivari Table Fit: plywood and Steel Skeleton legs.
- Also Under Stages: works with Standup Stage legs outdoors.

Finish	Warm Gray
Pack · Weight	4 feet · 0.35 lbs each

WHY IT WORKS

Engineered for the Ground You Were Given

Patent Pending

A widened base on the chair and a patent-pending disc under the leg — engineered, not improvised.

Load Distribution

44 lbs per square inch becomes 5. That is the whole argument, and it is measurable.

Turf & Sand Rated

Built for collegiate and professional fields, golf courses, beaches and garden lawns.

Fleet Retrofit

Shoes fit Chiavari, Cross Back and Bentwood chairs you already own. No new inventory.

2-Year Coverage

Two year total warranty on the chairs and the table feet alike.
