

Make the Frame Disappear.

A raised platform only looks finished once the frame underneath disappears. For too long event professionals have settled for pipe and drape to dress the one surface every eye in the room is drawn to. Stage Façade panels and posts hide wiring, cross-bracing and support legs behind a flush, furniture-grade face of solid wood.

THE SYSTEM

Panels, Posts, Any Stage

THE PANEL · 48" × 12" × 30"

Four Feet at a Time

The building block. Each panel wraps four feet of stage edge with a front overhang and flush sides, so sections butt together into an unbroken face. Solid wood, not fabric — furniture-grade enough for a keynote, warm enough for a wedding.

- **All Wood Construction:** solid wood, not pipe and drape or skirting.
- **Front Overhang:** a clean covered line along the top of the run.
- **Flush Sides:** panels align edge to edge with no visible break.
- **Folds Flat:** stacks for compact storage and lower freight.

AT A GLANCE

Nominal Size	48" × 12" × 30"
Actual W × D	47.83" × 13"
Height	30"
Material	Plywood
Ship Weight	48.00 lbs
Feet	Heavy-duty plastic

THE SQUARE POST · 12" × 12" × 34"

Square Off the Edge

Corner posts square every edge for a tailored, built-in look. The square-top version carries a 14" × 14" cap — a flat surface that takes signage, florals or uplighting where the run turns a corner.

- **14" × 14" Top:** a flat cap for signage, florals or uplighting.
- **Finishes the Corner:** turns a panel run into a built-in edge.
- **Tool-Free Connection:** posts and panels join with a hand knob.
- **Folds Flat:** same compact storage as the panels.

AT A GLANCE

Nominal Size	12" × 12" × 34"
Actual W × D	14" × 14"
Height	34"
Top Cap	14" × 14"
Material	Plywood
Ship Weight	27.00 lbs

THE ROUNDED POST · 12" × 12" × 34"

Soften the Corner

Patent-pending, and interchangeable with the square post. The rounded profile gives ends and transitions a softer finish — the same modular system, adapted to stages of virtually any size or configuration with no custom fabrication.

- **Patent-Pending Design:** adapts to any size or configuration.
- **Rounded Profile:** a softer transition at ends and corners.
- **Fully Interchangeable:** swaps with the square post on any run.
- **No Guesswork:** no custom fabrication to fit a stage.

AT A GLANCE

Nominal Size	12" × 12" × 34"
Actual W × D	14" × 14"
Height	34"
Profile	Rounded
Material	Plywood
Ship Weight	21.00 lbs

WHY IT WORKS

Finished, Portable, Built to Travel

All Wood Construction

Solid wood, not fabric — furniture-grade presentation that holds up to a rental calendar.

Folds Flat

Panels and posts fold for compact storage, lower freight cost and faster load-in.

Two Post Profiles

Square with a 14" cap or rounded — interchangeable on the same run.

Fits Any Stage

Modular sections adapt to virtually any size or configuration, no custom fabrication.

Protects the Venue

Heavy-duty plastic feet on every piece guard floors from scuffs, scratches and dents.
